

# ROMANIZATION SYSTEM FOR MONGOLIAN CYRILLIC

## BGN/PCGN 1964 System

The BGN/PCGN system for Mongolian Cyrillic was adopted by the PCGN in 1957 and by the BGN in 1964 for use in romanizing names written in the Mongolian Cyrillic alphabet. The Mongolian Cyrillic alphabet contains two characters not present in the Russian alphabet: **ө**, and **ү**. Names written in the indigenous Mongolian alphabet, which is still utilized in the Inner Mongolia Autonomous Region of China, are not romanized by BGN and PCGN. Instead, for such names, BGN and PCGN utilize the Roman-script spellings appearing in official sources published by the People's Republic of China.
